BCM SCHOOL, BASANT AVENUE, DUGRI
ANALYTICAL REASONING WORKSHEET-1
CLASS - II

Q1Read the passage carefully and answer the following questions -

Stilt houses are raised platforms on which a house is built. Stilt houses are usually built over water, but they may also be constructed over sand or dry land. The homes are usually made of wood, stone, cement, or bamboo. The raised level that is over the ground allows the water to stream beneath without harming the structure of the house. Stilt houses in India are most commonly built-in places, that are prone to flooding. Stilt houses are raised on stilts and are higher than a regular house. Regular homes are built on land but stilt houses use strong stilts, to avoid the risks of flooding. Stilt houses are found in Assam and these are also called as Sang Ghar in Assam.

1. Why stilt houses are built?
Ans.

_____
