

Certificate Course in “Business Intelligence, Data Visualization and Automation”

It's increasingly important for businesses to have a clear view of all their data to stay competitive, which is where business intelligence (BI) tools come in. After all, nearly 50% of all businesses already use BI tools, and projections show continued growth in coming years. Certificate in Business Intelligence using Power BI helps connect and import business data, create dashboards, generate reports and analyze data using Microsoft Power BI. Course helps you to get three distinct specializations, allowing you to focus on one domain at a time. *Data Analysis in Excel, Business Intelligence Analyst, Data Science Analyst.*
