Subject: Switch over to the Solar Energy  
Sir,

Through the well-known columns of your newspaper, I want to make a plea to the common people to switch over to the solar energy to conserve electricity and limit electricity bills.

Clean, renewable energy must become a priority to grow our economy, improve our health and protect our environment. We would harness the power of the sun to become a leader in solar energy development. We can use solar energy for cooking, lighting, heating and many other household choices. Solar energy is the energy derived from the sun. The energy can be used directly to heat items, and light homes or it can be converted into electricity using solar energy technologies like solar panels. We should increasingly invest in solar energy to save on out of pocket costs and get rid of dangerous and expensive power lines. Its installation, maintenance and monitoring of the system come free of charge and are part of the deal. Renting solar energy inflates electricity bills. Even if the sun doesn't shine, one remains on the grid. Using partial Solar Energy and partial electricity. I would request the government representatives also to make the people aware about the advantages of solar energy and how to use it.

I would be thankful to you, if you publish this letter in public interest.

Thanking you

Yours truly  
XYZ
