a.Flash flood b.Landslide c.Avalanche

Ans.a.**Flash flood**: A sudden local flood, often caused by a cloudburst in mountains is known as flashflood.

b.**Landslide**: It is the sudden collapse of a mass of earth or rock from a mountainside.

c.**Avalanche**: Avalanche is the sudden fall of snow, ice or rocks from a mountainside. It often occurs when the snow starts melting.

Q8.'The Northern Mountains are sparsely populated'. Do you agree with the statement? Give reasons to justify your answer.

Ans.Yes,I agree with the statement. The Northern Mountains are sparsely populated because of the following reasons.

- 1.Due to steep slopes limited arable land is available.

2.Climate is harsh in the mountains.

3.Water resources are limited.

4.It is difficult to construct buildings and houses in the mountains.

5.Construction of transport network is also difficult in the mountains.
