Class XI

English Assignment

Q1. Read the passage carefully and answer the questions that follow:

In the 21st century, the definition of intelligence is undergoing a profound transformation. For decades, IQ was considered the ultimate measure of human potential. However, modern research emphasizes Emotional Intelligence (EQ), Adaptability Quotient (AQ), and Creativity Quotient (CQ) as equally essential indicators of success.

Emotional intelligence helps individuals navigate relationships, manage stress, and empathize with others. In workplaces, emotionally intelligent leaders foster trust and collaboration. Meanwhile, adaptability has become the cornerstone of survival in an era dominated by artificial intelligence, automation, and global crises. Those who adapt quickly, learn continuously, and remain resilient are the true leaders of tomorrow.

Creativity, often underrated, fuels innovation and problem-solving. It empowers individuals to connect unrelated ideas and find unique solutions. Countries investing in creative education and research are more likely to lead the knowledge economy. However, overemphasis on marks and rote learning still limits this potential in many developing nations.

As the world faces unpredictable challenges—from climate change to technological disruption—the most valuable minds will not be those with the highest IQ, but those who blend emotional depth, adaptability, and creativity. Education, therefore, must evolve from producing test-takers to nurturing problem-solvers, empathizers, and innovators.

On the basis of your reading, make notes using headings and sub-headings (minimum 4 abbreviations). Use a suitable format. Then write a summary of the passage.

Q2. Design an attractive and informative poster on the theme:

- “Digital Detox: Reconnect with Real Life”

Q3. You are participating in an inter-school English debate competition. The motion reads:

- “Artificial Intelligence will make teachers irrelevant in the future.”

Write a debate in about 150–180 words, either for or against the motion.
