1. **Choose the correct option.**
(i)   b)
(ii)   c)
(iii)   b)
(iv)   b)

HINTS

2. Divide 755 by 18 and use following formula to verify the answer:
$$Dividend = (Q \times D) + R$$

3. Write / Recall table of 17 to find multiples.

4. Write multiples of 4, 8 and 12, then circle common multiples and the write least common multiple.

CASE STUDY

5.

a) Write statement and divide 90,475 by 5.

b) Write statement and multiply 125 by 9.

c) Add cost of double-bed and sofa-set.
