

READING SECTION

1. What is the main job of the queen bee in a hive?

☒ C) To lay eggs

2. What helps bees communicate the location of food to others?

☒ B) The waggle dance

3. Fill in the blank:

Bees help plants grow and produce food by ☒ pollinating them.

4. True or False:

Worker bees are the only ones in the hive that can lay eggs.

☒ False

5. Why would fruits and vegetables not grow properly without bees, even though plants can grow on their own?

☒ Because bees help in pollination by transferring pollen from one flower to another, which is necessary for fruits and vegetables to grow.

6. How do bees know where to go when searching for flowers?

☒ They use the sun, the scent of blossoms, and their senses to find flowers.
