BCM SCH		
CLASS	S – III MATHE	MATICS
Re	evision Assignment De	cember 2024
	Section -A	
Tick the correct	ct option:	
1. Fractions th	at have different d	enominator
a) Like	b) unlike	c) unit
2. Number of c	days in current year	•
a)360	b)365	c) 366
4. The minute	hand will be at	if the time is quarter past 7?
a)3	b) 9	c) 12
5. Dividend in	465÷5= 93	
a)5	b) 93	c) 465
6. CASE STUDY		
NA:		
iviina nas 6 0	ranges and she war	nts to share them equally among
herself and h	_	nts to share them equally among
herself and h	_	
herself and h Q1. How mar Q2. If Mina e	er 2 friends. ny oranges will each ats 2 oranges befor	
herself and h Q1. How mar Q2. If Mina e left to d	er 2 friends. ny oranges will each ats 2 oranges befor livide?	n person get? e sharing, how many oranges are
herself and h Q1. How mar Q2. If Mina e left to d	er 2 friends. ny oranges will each ats 2 oranges befor livide?	n person get?
herself and h Q1. How mar Q2. If Mina e left to d Q3. Can the r	er 2 friends. ny oranges will each ats 2 oranges befor livide? emaining oranges b	n person get? e sharing, how many oranges are be divided equally among 3 people
herself and h Q1. How mar Q2. If Mina e left to d Q3. Can the r 7. Circle the pr	er 2 friends. ny oranges will each ats 2 oranges befor livide? emaining oranges befor Section-B	n person get? e sharing, how many oranges are be divided equally among 3 people
herself and herse	er 2 friends. ny oranges will each ats 2 oranges before livide? The emaining oranges before Section-Boroper fractions in the $\frac{2}{7}$ $\frac{6}{7}$	n person get? The sharing, how many oranges are sharing, how many oranges are sharing among 3 people sharing are following
herself and herself and herself and herself and herself and herself and herself are determined by the second and herself and	er 2 friends. By oranges will each ats 2 oranges before livide? The emaining oranges be section-Boroper fractions in the $\frac{2}{7}$ $\frac{6}{7}$ ime am and pm for	n person get? e sharing, how many oranges are be divided equally among 3 people he following the following
herself and herse	er 2 friends. By oranges will each ats 2 oranges before livide? The emaining oranges be section-Boroper fractions in the $\frac{2}{7}$ ime am and pm for k in the evening	n person get? e sharing, how many oranges are be divided equally among 3 people he following the following
herself and herse	er 2 friends. By oranges will each ats 2 oranges before livide? The emaining oranges be section-Boroper fractions in the $\frac{2}{7}$ $\frac{6}{7}$ ime am and pm for	n person get? e sharing, how many oranges are be divided equally among 3 people he following the following
herself and h Q1. How mar Q2. If Mina e left to d Q3. Can the r 7. Circle the pr $\frac{7}{9}$ $\frac{1}{3}$ $\frac{6}{4}$ 8. Write the ti a. 5 o'clock b. eleven o	er 2 friends. The property of the expension of the evening $\frac{2}{7}$ of the evening $\frac{6}{7}$	n person get? e sharing, how many oranges are be divided equally among 3 people he following the following
herself and h Q1. How mar Q2. If Mina e left to d Q3. Can the r 7. Circle the pr $\frac{7}{9}$ $\frac{1}{3}$ $\frac{6}{4}$ 8. Write the ti a. 5 o'clock b. eleven o	er 2 friends. The property of the expension of the expe	n person get? e sharing, how many oranges are be divided equally among 3 people he following the following
herself and herse	er 2 friends. The property of the expension of the expe	n person get? e sharing, how many oranges are be divided equally among 3 people he following the following bw the given time half past 1
herself and herse	er 2 friends. ny oranges will each ats 2 oranges before livide? remaining oranges before Section-Beroper fractions in the 2 6 7 7 fime am and pm for k in the evening o'clock at night Section-Ce ands of clock to show ast 5 b. here	n person get? The sharing, how many oranges are sharing, how many oranges are she divided equally among 3 people are following The following The following The following The answer.
herself and how man Q1. How man Q2. If Mina explicitly left to d Q3. Can the result of $\frac{7}{9}$ and $\frac{1}{3}$ and $\frac{6}{4}$ 8. Write the time a. 5 o'clock b. eleven decrease 9. Draw the homogeneous and quarter possible 10. Divide 649.	er 2 friends. ny oranges will each ats 2 oranges before livide? remaining oranges before section-Beroper fractions in the evening or clock at night Section-Ce ands of clock to show ast 5 b. Herope 198 by 8 and verify the section - I	n person get? The sharing, how many oranges are sharing, how many oranges are she divided equally among 3 people are following The following The following The following The answer.
