CLASS- VII
SUBJECT:ENGLISH

Reading

(A)

(a) (i) Male

(b) iv) playing

(B) I.

- It helps them reach foliage that other leaf-eating animals cannot.
- It allows them to have a long range of vision and get early warning of predators.

II.

- In spring, many trees are not in leaf, so giraffes must spend more time eating to get enough food.
- This shows they adjust their feeding habits according to the availability of food in different seasons.

III. Humans can learn to adapt resourcefully to challenges and make the best use of their abilities to overcome difficulties in their environment.

(c) **Complete the following sentences:**

I. Sharp eyesight helps giraffes not only have a long range of vision, it also helps them **get early warning of approaching predators.**

II. During **spring**, giraffes spend most of their daylight time eating because **many trees are not in leaf and food is scarce.**

III. A giraffe's neck is usually flexible due to **the elongated vertebrae connected by ball and socket joints.**

2.
