WEBSITE ASSIGNMENT

SECTION A – CHOOSE THE CORRECT OPTION

Q1. A student wants to find the exact location of a city using its distance north or south of the Equator and east or west of the Prime Meridian. Which two coordinates will be most useful?

- a) Scale and symbols
- b) Latitude and longitude
- c) Directions and colours
- d) Continents and oceans

Q2. Assertion (A): A timeline helps us understand the chronological order of historical events.

Reason (R): Events arranged randomly give a clear picture of history.

- a) Both A and R are true, and R is the correct explanation of A
- b) Both A and R are true, but R is not the correct explanation of A
- c) A is true, but R is false
- d) A is false, but R is true

Q3. Assertion (A): The Pacific Ocean is the largest ocean on Earth.

Reason (R): It covers more area than all the continents combined.

- a) Both A and R are true, and R is the correct explanation of A.
- b) Both A and R are true, but R is not the correct explanation of A.
- c) A is true, but R is false.
- d) A is false, but R is true.

Q4. Riya moves to a different state of India and notices that people speak a different language, eat different food and celebrate different festivals. However, they respect one another and work together as a community. What does this situation best demonstrate?

- a) Differences always lead to conflict.
- b) Unity in diversity means respecting differences while living together peacefully.
- c) People should follow the same language and customs.
- d) Cultural differences should be avoided.

SECTION B – VERY SHORT ANSWER

Q5. Differentiate between a continent and an ocean. Give one example of each.

Q6. Historical sources are important for learning about the past. Justify.

SECTION C – SHORT ANSWER

Q7. There are different types of maps showing boundaries, physical features, climatic conditions, means of transport, and specific themes like crops or industries. Explain any three types of maps with examples.

Q8. Ravi's father grows wheat, which is made into flour and then sold in shops. Identify the primary, secondary and tertiary activities involved in this process. Explain how these three activities are connected.

SECTION D – LONG ANSWER

Q9. Write a short note on textiles and clothing in India.

SECTION E – CASE STUDY

Q10. Read the case carefully and answer the questions.

Anaya moved with her family to a new town. In her neighbourhood, people came from different parts of India. They spoke different languages and followed different food traditions and festivals. Some residents worked as teachers, some as shopkeepers, some as farmers, while others provided services such as transport and healthcare.

During a community celebration, everyone contributed in different ways. Some prepared food, some decorated the place, and others helped organise games for children. Anaya noticed that although people had different traditions, they worked together and respected one another.

- a)** The situation reflects people from different backgrounds coming together in harmony. State the value highlighted by this example.
- b)** Give one example from the case that shows people performing different kinds of work.
- c)** Explain the importance of cooperation in a family and community.
- d)** Imagine that two people in the community have different food traditions. How can they respect each other's choices?

SECTION F – MAP WORK

Q11. On a world map, locate and label:

- a)** The Equator
- b)** The Prime Meridian
