

BCM SCHOOL, BASANT AVENUE, DUGRI, LUDHIANA.
REVISION ASSIGNMENT OCTOBER 2024
CLASS- V (MATHEMATICS)
TOPIC : Geometry

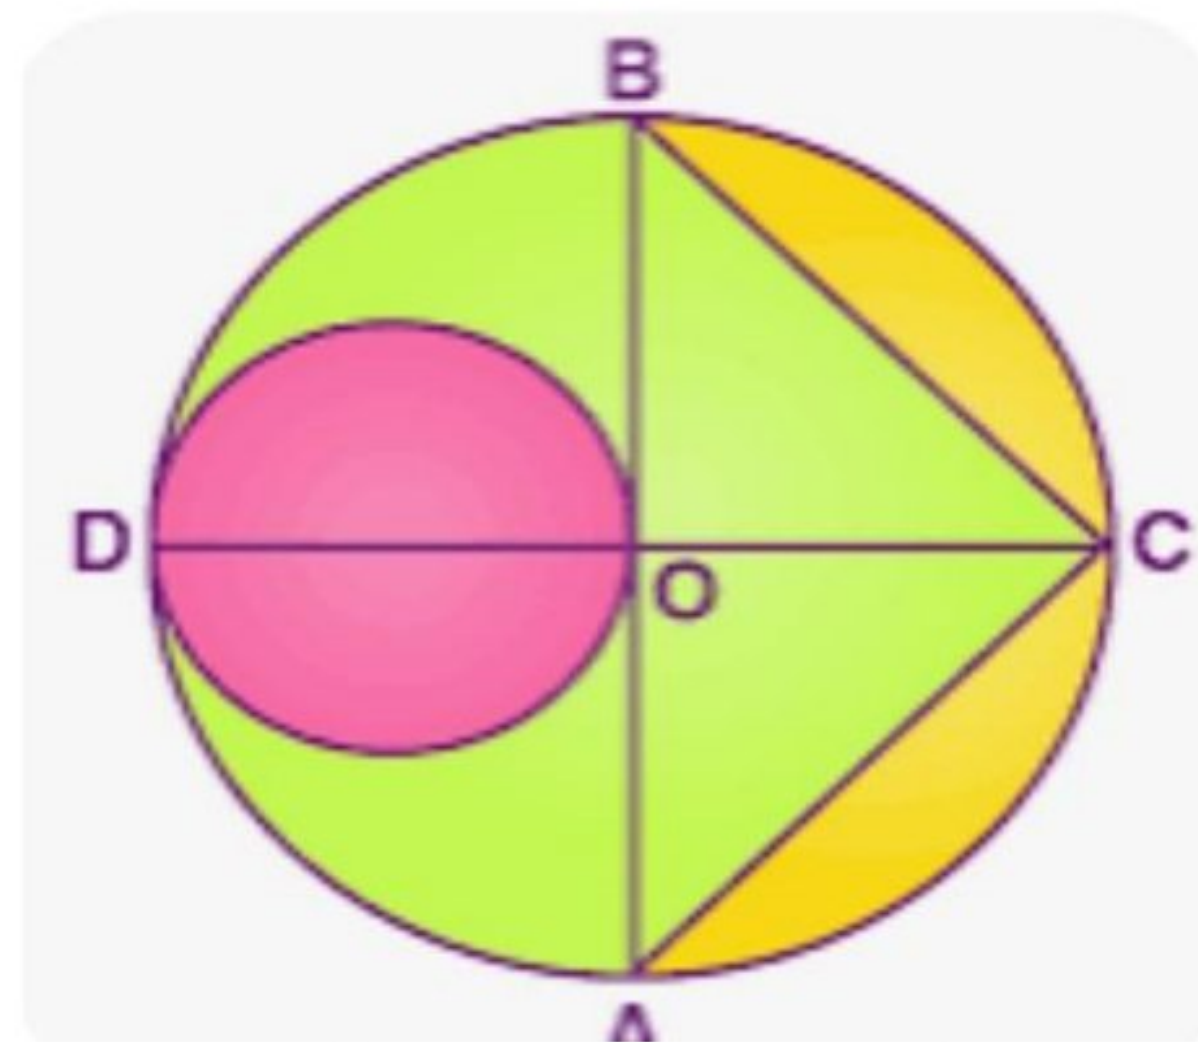

1.	The diameter of a circle is ___ of the radius . (a) double (b) half (c) equal
2.	The sum of angles of a triangle is _____. (a) 90° (b) 180° (c) 360°
3.	The triangle having three sides unequal is called _____. (a) Equilateral (b) Isosceles (c) scalene
4.	The sum of two sides of the triangle is always _____ to the third side. (a) greater (b) smaller (c) equal
5.	Check whether the triangle is possible in following cases. a) The triangle having three angles are $50^\circ, 30^\circ, 110^\circ$ b) The triangle having three sides of measures 5cm, 8cm, 3cm
6.	Draw an angle ABC of 60° and write it's vertex, arms and classification.
7.	Name the following triangles 
8.	Name each polygon given below on the bases of their sides. 

9. Write the name of all the angles of the given figure

Case Study

10. Kirti has chosen a rangoli design for her competition . She made a circular design with different parts of the circle. Answer the following questions related to the figure.

- Write the diameters of the bigger and smaller circle.
- Write all chords of the bigger circle .
- Name all the radii of the bigger circle .
- Name the longest chord of the circle.
