Q8: Read the following passage and answer the questions that follows:

The cold weather season begins from mid-November in Northern India and stays till February. December and January are the coldest months in the Northern part of India. The temperature decreases from South to the North. The average temperature of Chennai, on the Eastern coast, is between 24°-25° Celsius, while in the Northern plains, it ranges between 10°- and 15°- Celsius. Days are warm and nights are cold. Frost is common in the North and the higher slopes of the Himalayas experience snowfall. During this season, the North-East trade winds prevail over the country. They blow from land to sea and hence, for most part of the country, it is a dry season. Some amount of rainfall occurs on the Tamil Nadu coast from these winds as, here they blow from sea to land.

(I) When does the cold weather season begin in India?

(II) Name the winds that prevail over the country during the winter season.

(III) What type of weather is seen in this season?
